

A MEMBERSHIP ORGANISATION
FIGHTING CANCER TOGETHER

UICC Business Plan 2019-2020

“We unite and support the cancer community to reduce the global cancer burden, to promote greater equity, and to ensure cancer control continues to be a priority in the world health and development agenda.”

The worst hit will be those in less developed countries...

Source: WHO GloboCan

UICC is determined to make a difference

- Oldest and largest cancer fighting organisation globally, established in **1933**
- A non government organisation in Switzerland
- More than **1100** members across **164** countries
- Official relations with **UN** agencies: **WHO, IARC, IAEA, UNODC** and consultative status at **ECOSOC**
- A team of 40 based in Geneva
- A Board elected by the UICC Membership

Focusing on three key areas...

Convening

Provide platforms for the entire cancer community to **join forces** and **drive change on a global scale**

Capacity Building

Innovative tools and skills to help **organisations do a better job tomorrow than they are already doing today**

- Leadership development (CEOs, young leaders)
- Peer to peer capacity building at global and regional levels
- Online education and resources
- Grants for fellowships, project improvement, workshops, change and innovation
- Improving national advocacy for treatment and care

Advocacy

Promote 'Treatment for All', including:

Follow through on the World Health Assembly Cancer Resolution 2017

Integrate cancer control in the **global health and development agendas, including:**

- NCDs
- Universal Health Coverage
- Sustainable Development Goals

We've been on a journey called "Roadmap" since 2010...

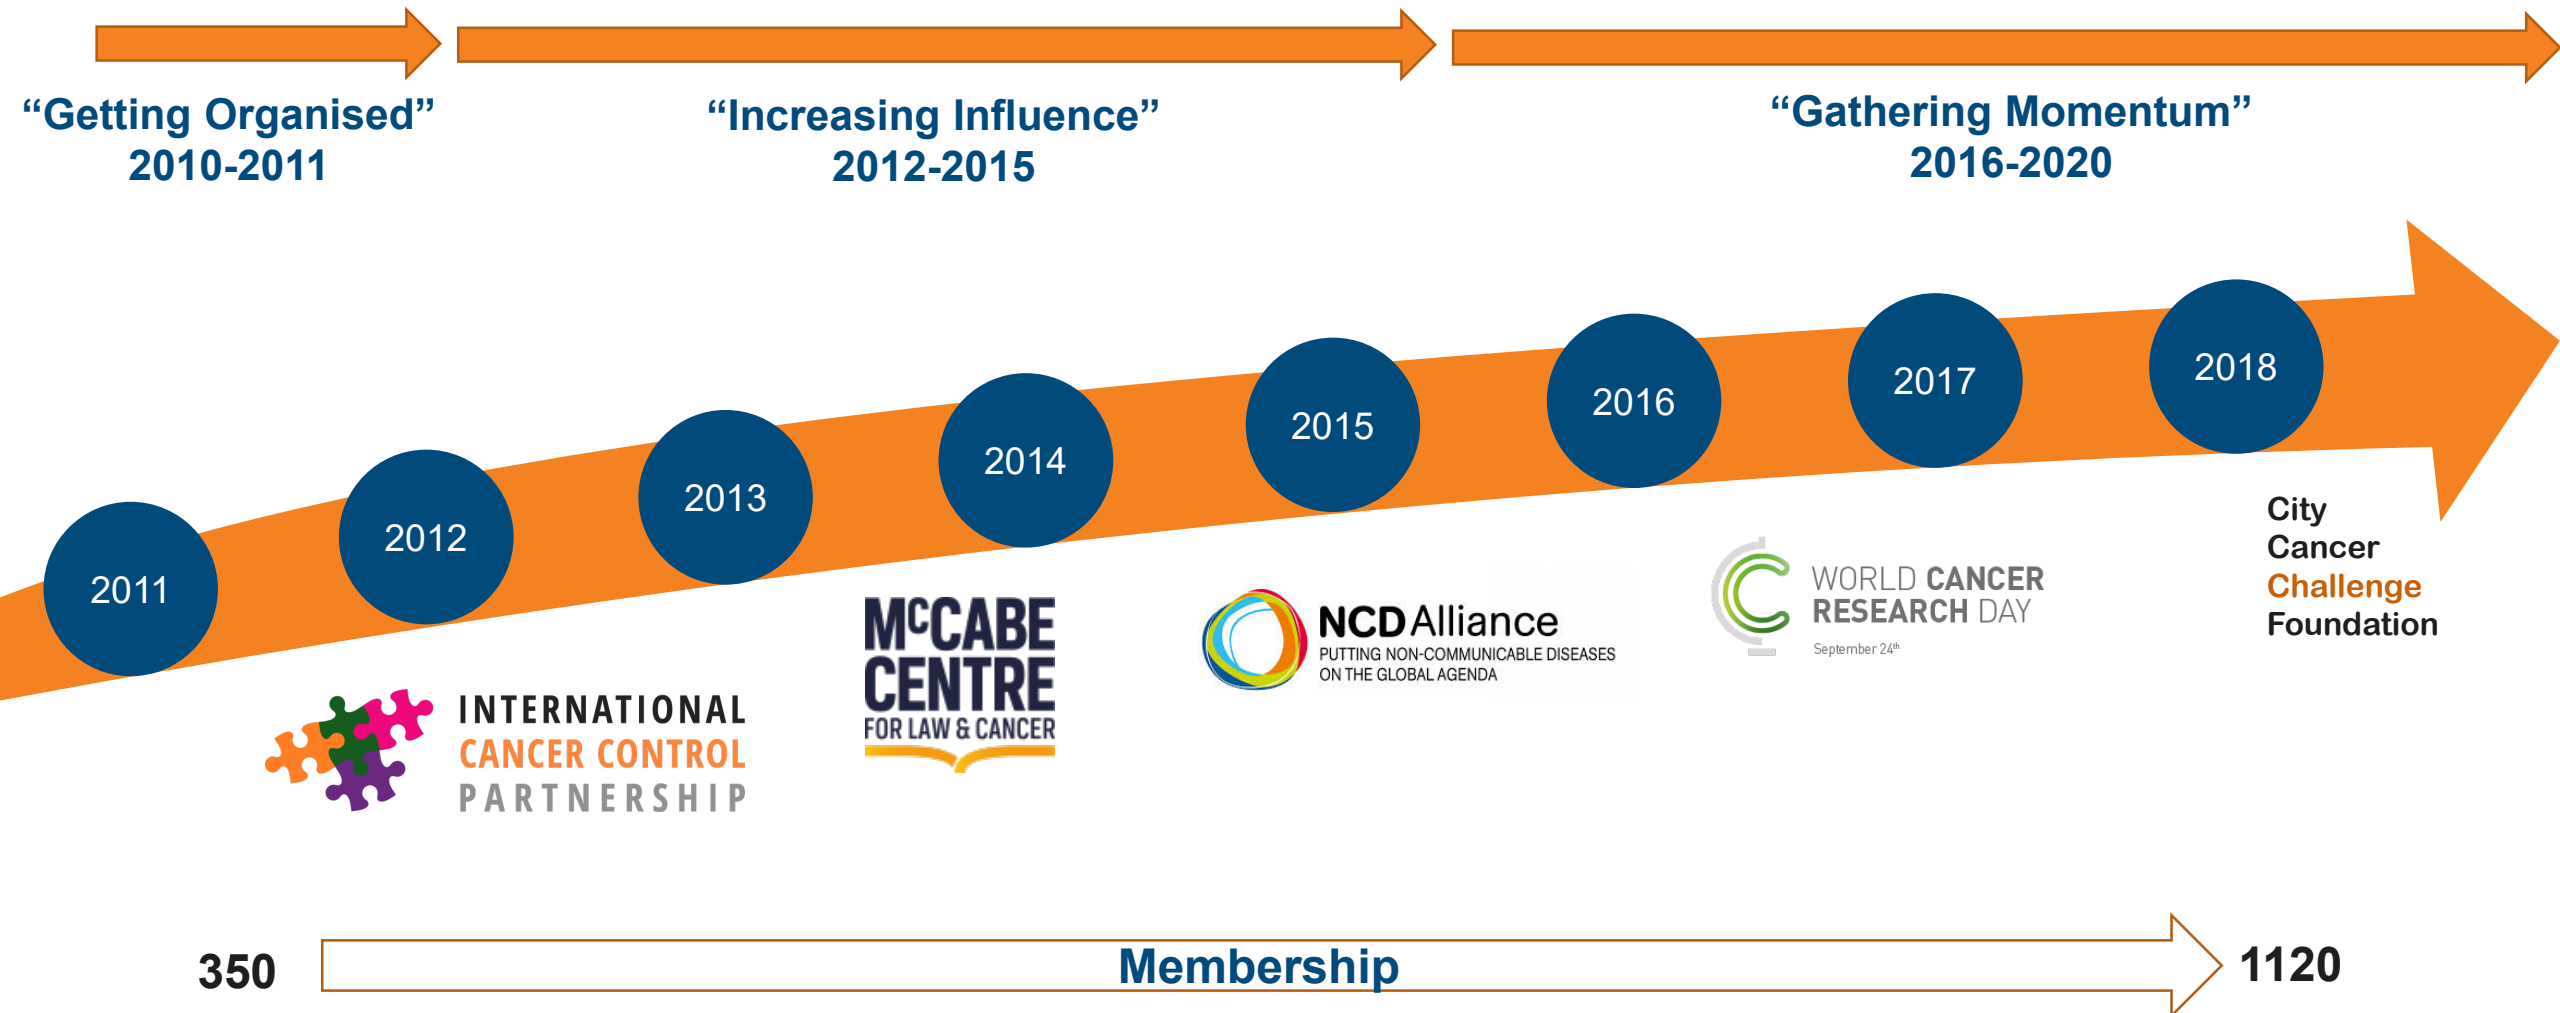

"Getting Organised"
2010-2011

"Gathering Momentum"
2016-2020

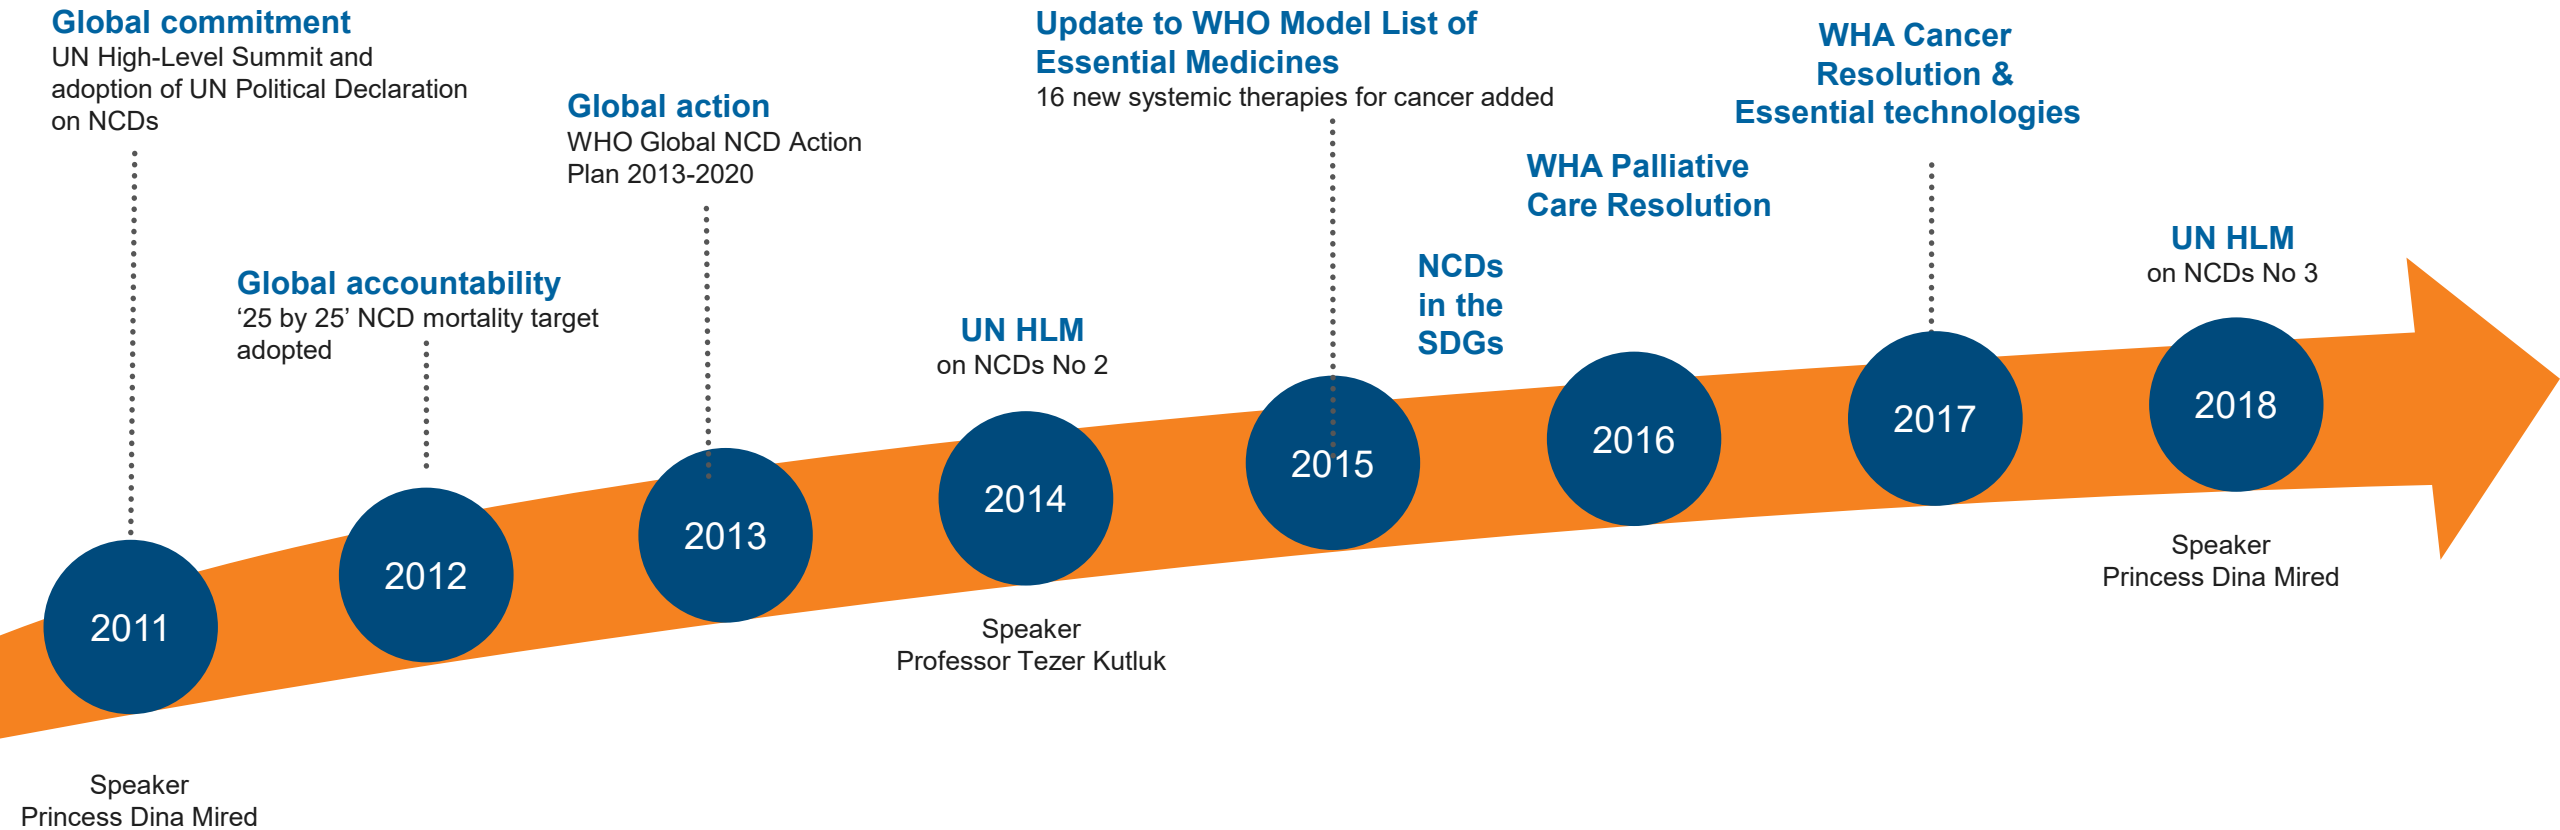

"Increasing Influence"
2012-2015

We have grown rapidly and created new organisations....

And placed cancer on the global health and development agenda...

...taking our message around the world...

With a World Health Assembly Resolution in our hands...

SEVENTIETH WORLD HEALTH ASSEMBLY
Provisional agenda item 15.6

A70/32
13 April 2017

Cancer prevention and control in the context of an integrated approach

Report by the Secretariat

1. In January 2017, the Executive Board, at its 140th session, considered an earlier version of this report that contained a draft resolution.¹ During the discussions,² an informal drafting group was set up so that consensus could be reached on the text of the draft resolution. Despite progress made by the drafting group, consensus was not achieved before closure of the Board's session and certain paragraphs of the draft resolution remained pending. The Board then agreed that the discussion of those outstanding paragraphs would be continued during the intersessional period.

BURDEN AND TRENDS

2. Cancer is a growing public health concern. In 2012, there were 14.1 million new cases and 8.2 million cancer-related deaths worldwide. The number of new cases is projected to increase to 21.6 million annually by 2030. The greatest impact is in low- and middle-income countries, many of which are ill-equipped to cope with the escalating burden of disease, and where 65% of cancer deaths occur.

3. In 2012, there were 4.3 million premature deaths from cancer worldwide, 75% of which were in low- and middle-income countries. In order to achieve Sustainable Development Goal 3 (Ensure healthy lives and promote well-being for all at all ages) and its target 3.4 to reduce, by 2030, premature mortality from noncommunicable diseases, including cancer, by one third, an urgent scale-up of actions is needed. This scale-up should include actions that apply also to other targets, such as target 3.a to strengthen the implementation of the WHO Framework Convention on Tobacco Control by all Parties to the Convention, as appropriate.

4. Progress in cancer control has been uneven. In spite of known effective interventions, the burden of cervical cancer, for example, remains greatest in low- and middle-income countries, where progress has been the slowest. While there have been moderate improvements in age-standardized cancer mortality rates in high-income countries, reaching a 25% reduction in some settings, overall declines in mortality from cancer have not been achieved globally.

¹ Document EB140/31.

² See the summary records of the Executive Board at its 140th session, fourteenth meeting, fifteenth meeting, section 1 and eighteenth meeting, section 3.

- Advocacy drew on momentum from World Cancer Declaration Report and Lancet Commissions in 2016-18
- Emphasises need for holistic approach to cancer treatment: *“Member States should increase efforts to strengthen health systems at the national and local levels to ensure early diagnosis and accessible, affordable and high-quality care for all cancer patients”*
- Crucial advocacy tool for holding governments accountable and tracking progress
 - WHO to publish World Cancer Report due 2019
 - UICC to work with members to advocate for national implementation of Appendix 3 of the NCD Global Plan, Essential Medicines and Technologies lists
- Cervical Cancer Elimination Project kicked off with WHO

We start 2019 with a refreshed Purpose Statement...

“We unite and support the cancer community to reduce the global cancer burden, to promote greater equity, and to ensure that cancer control continues to be a priority in the world health and development agenda.”

We will bring the world together...

Increasing the impact of our convening activities around the world...

And support our members improve everything they do...

Extending our training and knowledge dissemination role in the cancer community

Following up on the 2017 Cancer Resolution...

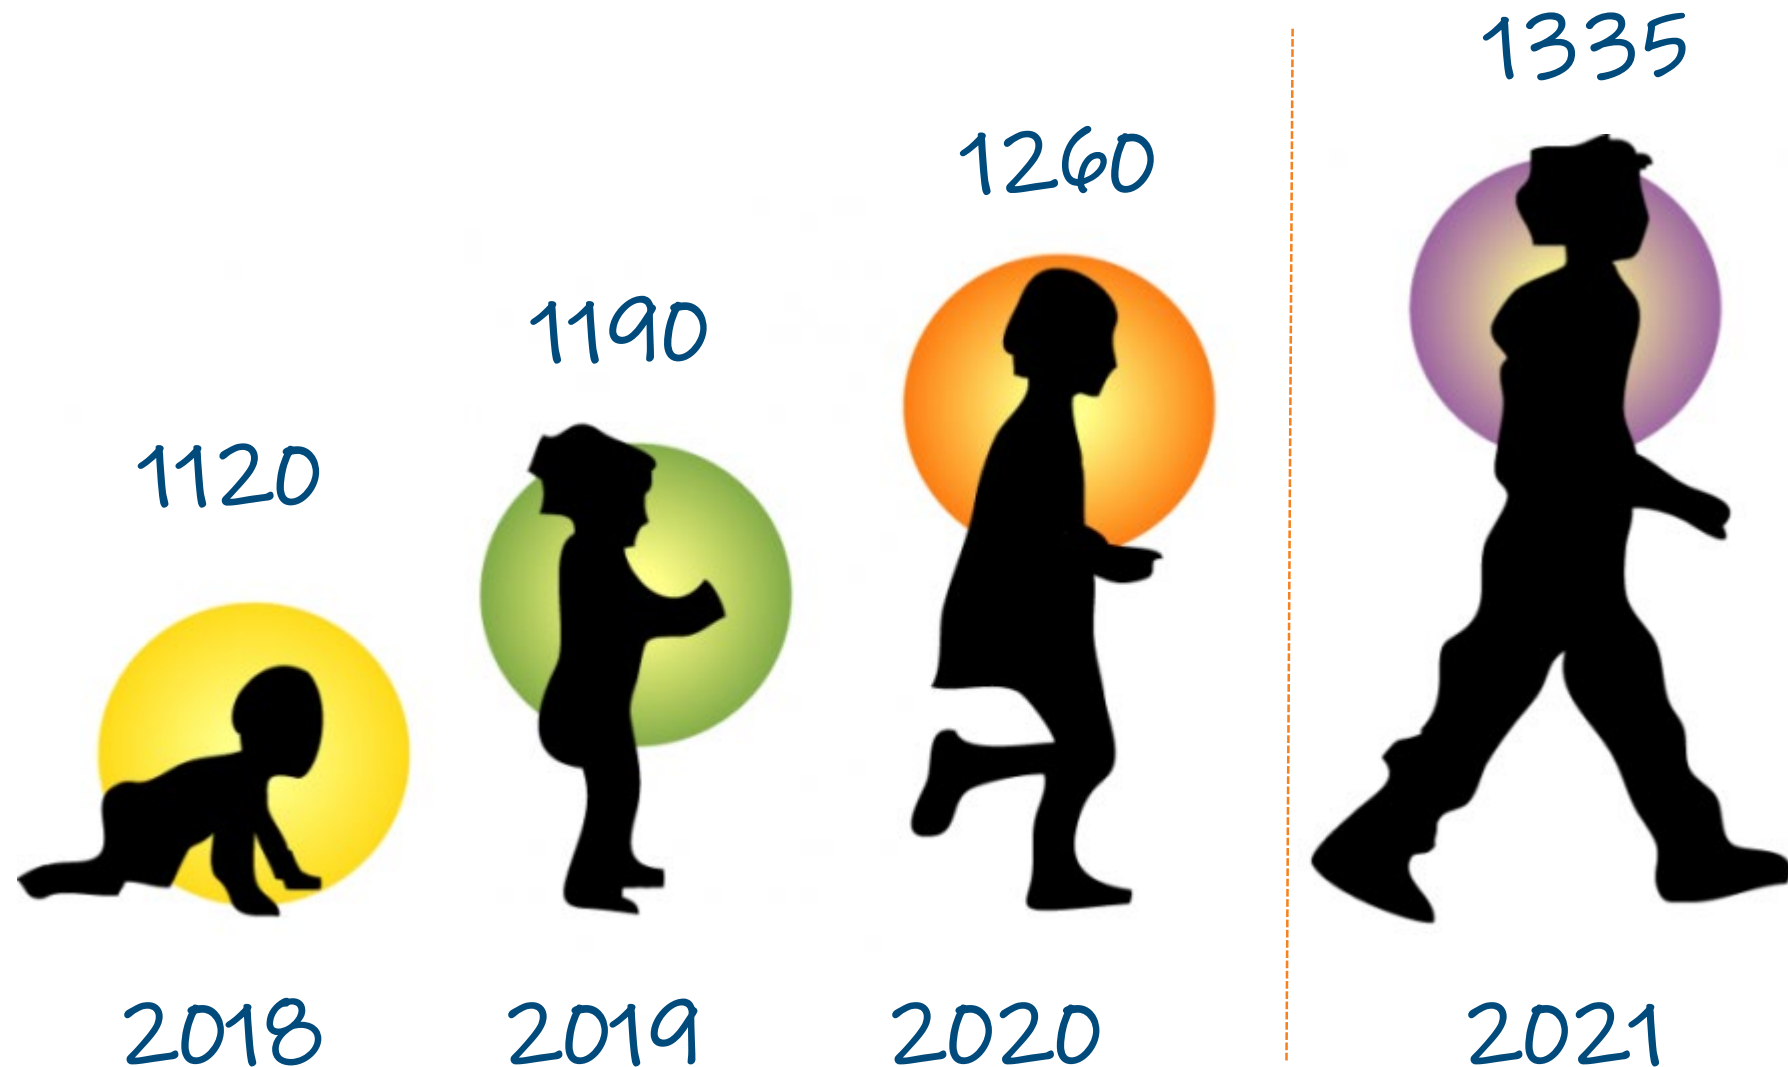

Pressing forward with advocacy ensuring we capitalise on the Cancer Resolution 2017

Creating e-UICC to deepen the connections with and between members...

Our membership base will continue to grow...

Increasing our fund base to extend our impact...

Doing more of the things we know make a difference...

2018 includes use of funds raised in 2017 also.
